

### **What is LATT?**

Learn All The Time is an intermediary organization with a clear focus and strategic plan to increase the quality, outcomes, and the capacity of out of school time (OST) programs.

Our goals are to deliver real outcomes through systems building that include:

- Maintaining quality standards
- Providing quality training resources
- Providing information and research to the public
- Helping with access to programs for children and families
- Organizing efforts for efficiency
- Maximizing resources

### **Our Mission**

To foster, support and grow an ecosystem of high-quality out of school time (OST) programs and experiences that are made accessible for all Central Texas children and youth, regardless of economic background.

### **LATT Provides:**

- Networking opportunities and community building
- Professional development and conferences
- Leadership development
- Resources
- Research and information on trends and best practices in OST

### **Out of School Time Overview**

Out of school time programs provide regularly scheduled, structured and supervised activities where learning opportunities take place outside the typical school day.

Research shows that students who participate in these programs show:

- increased school attendance
- enhanced engagement in learning
- improved test scores and grades
- decreased dropout rates
- improved emotional and social skills
- decreased involvement in irresponsible behavior

**Learn All The Time Organizational Goals:**

- Develop a systemic approach to out of school time (OST) in Central Texas
- Develop strong leadership to build capacity and improve effectiveness
- Expand our regional influence and impact throughout Central Texas

**Quality  
Committee**

Serves to establish a clear definition of quality and to provide standards based professional development and resources to build capacity and increase OST program quality.

**Capacity &  
Advocacy  
Committee**

Serves to build and sustain awareness of OST programs in order to increase access and community involvement through research, partnerships and information sharing.

**Outcomes  
Committee**

Serves to create a deeper understanding of data in order to drive decisions and measure impact.
